

## Faculty of Mechanical Engineering and Informatics

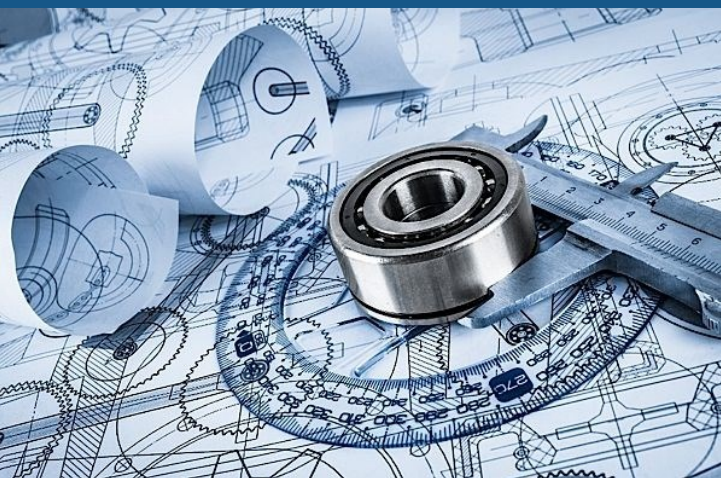

The Faculty of Mechanical Engineering and Informatics is a modern engineering faculty of multidisciplinary nature. The faculty currently offers two MSc courses and one PhD course in Computer Science and Engineering in English. Besides the English language study programmes, we offer 11 BSc courses, 6 MSc courses, and 2 PhD courses are available in Hungarian covering a wide range of mechanical engineering, information engineering, and electrical engineering areas. Building on the faculty's six and a half decades of experience all staff members aim to provide practice oriented education based on broad theoretical background. The faculty has strong relationship with many industrial partners of the region to involve up-to-date technologies and trends into the educational and research activities.

Degree courses offered by the Faculty:

Mechanical Engineering, MSc  
Computer Science and Engineering, MSc  
Mechanical Engineering, PhD

## Why study at the University of Miskolc (UoM), Hungary?

- a beautiful, welcoming country in the heart of EU, inhabited by friendly people;
- a safe country offering affordable cost of study and living, good quality of life, excellent infrastructure, health and sport services, picturesque landscape, a flourishing culture, and many-many more... ;
- a great stepping-stone to the rest of Central and Eastern Europe - great rail networks heading to neighbouring and nearby countries like Austria, Slovakia, Poland, Serbia, Czech Republic, Croatia, Slovenia and Romania;
- cheap restaurants, good meals & vibrant nightlife;
- the UoM has largest campus in Hungary located in a spacious park between the city centre and the picturesque Bükk Hills;
- modern campus infrastructure - in campus hostels, sport facilities, indoor swimming pool, restaurants, cafes, and many more;
- Multidisciplinary faculties, multicultural environment

### ENGINEERING SCIENCES

The  
Campus of  
and Knowledge  
Community Spirit

## Introduction

A unique, spacious campus, home of more than 10 thousand students and 600 lecturers and researchers, in a beautiful natural environment, up-to-date laboratories, lecture halls, workshops, dormitories and facilities for sport, culture and entertainment – this is the University of Miskolc. Tradition (founded in 1735) combined with novel directions in research and education result not only in a large number of professional awards, but also in an increasing interest of foreign and Hungarian students who pursue studies at the highest academic level at the University of Miskolc. Graduates of the University acquire exceptional skills during their time in Miskolc and gain jobs with a wide variety of top employers. Miskolc with its more than 150 thousand inhabitants is a traditional industrial city, the cultural and economic centre of the North Hungarian Region. The University of Miskolc welcomes all purposeful and motivated students who aim to study in a traditional still modern and fresh academic environment.

### Study programmes in English (tuition fee / semester)

#### Faculty of Earth Science and Engineering

Hydrogeological Engineering, MSc	3500 EUR
Petroleum Engineering, MSc	3500 EUR
Earth Sciences Engineering, MSc	3500 EUR
Petroleum Geoengineering, MSc	3500 EUR
Earth Sciences, PhD	3500 EUR

#### Faculty of Materials Science and Engineering

Materials Engineering, MSc	3500EUR
Metallurgical Engineering, MSc	3500EUR
Material Sciences and Technologies, PhD	3500EUR

#### Faculty of Mechanical Engineering and Informatics

Mechanical Engineering, MSc	3000EUR
Computer Science and Engineering, MSc	3000EUR
Mechanical Engineering, PhD	3500 EUR

#### SCHOLARSHIP PROGRAMME financed by the Hungarian Government

All above study programmes are available in the frame of Stipendium Hungaricum Scholarship Programme financed by the Hungarian Government for foreign students. Provisions covered by the SH Scholarship: exemption from tuition fee, a monthly stipend between cc. 140 and 500 EUR, accommodation and health insurance. At present the number of SH students at the University of Miskolc arriving from all corners of the world is above two hundred. Be one of them!

## Faculty of Earth Science and Engineering

The Faculty offers versatile and unique degree programmes to its students with outstanding infrastructural and academic background. The Faculty carries out research and trains engineers in the following fields: locating, exploiting and processing natural resources, preserving the natural environment as well as managing and decreasing damage caused to the environment by civilization. The objective of the study programmes offered by the faculty is to train engineers who become aware of the laws of nature, of earth science and environmental sciences. Graduates of the Faculty design, manage, exploit, prepare and locate raw material, energy resources and water supplies as well as exploit prepare, plan and carry out geological research for non-mining purposes.

#### Degree courses offered by the Faculty:

Hydrogeological Engineering, MSc  
Petroleum Engineering, MSc  
Earth Sciences Engineering, MSc  
Petroleum Geoengineering, MSc  
Earth Sciences, PhD

## Faculty of Materials Science and Engineering

Facing the constantly changing demands of economy and industry the Faculty focuses on the following research and educational activities: ceramics and silicate technology, nanotechnology, polymer technology, quality control, energy management, technology of the chemical industry and metallurgy offering full degree programmes at MSc and PhD levels to its students. Besides the fundamental knowledge related to the structure and the properties of materials, students acquire various material technologies during their studies. In addition to the fields of materials science and technologies in a narrow sense, the faculty also focuses on issues of materials informatics, materials testing, automation, energy management, waste management, industrial and craft design, surface technology, environment protection and quality assurance related to materials production.

#### Degree courses offered by the Faculty:

Materials Engineering, MSc  
Metallurgical Engineering, MSc  
Material Sciences and Technologies, PhD

## Student Services

### Library

The university operates a library network which includes the Central Library and the libraries of faculties, institutes and departments. The total stock approximates 600,000 books and 2,660 journals serving around 100,000 users every year. This public and research library provides access to national and international databases, to articles, theses, studies, periodicals and teaching materials which are closely linked to the training courses of the University.

### Residence Halls

The Bolyai Halls of Residence are located in the Campus in a beautiful natural green area, only a short walk away from the academic buildings, the service centre and the sports hall. A real multinational atmosphere awaits the students here. The six halls accommodate more than 2100 students and provide decent circumstances for recreation, entertainment and of course to study.

### International Office

Friendly colleagues stocked with expertise help foreign students in going through the process from "application to registration". The office helps students in all kinds of administrative and academic issues from VISA application to accommodation reservation and many more...

### Mentor system

The University is committed to support its undergraduate and graduate international students through the various stages of integration into the academic and social life of the University. On this basis, two **mentor systems** are in operation called ESN and Stipendium. Mentors, who are Hungarian students of the University of Miskolc provide foreign students with **guidance** and **academic coaching** throughout their stay in Miskolc, welcome foreign students on arrival, organise social events, excursions, team-building parties and many more...

### Confucius Institute

Learning Chinese language at the University of Miskolc is an available extra curricular activity since 2012. Besides Chinese language courses the Confucius Institute offers Chinese cultural activities, summer camps and various social events to its students and visitors.

### In-Campus Entertainment and Sport

Students can join numerous international student organisations and can find different forms of self-expression in clubs and students' groups supported by the Students' Association at the University of Miskolc. Clubs and discotheques, tennis courts, athletics tracks, sport courts, football pitches, as well as a swimming pool are all at the disposal of students.

## Faculty of Economics

The Faculty of Economics offers high standard Master and PhD degree programmes in English language according to the Bologna System to prospective students. We not only provide our students with thorough theoretical foundations but also put emphasis on improving our students' business skills through the Faculty's active and extensive relations with industry leaders and top companies. Our widely recognized full-time MBA programme is particularly useful for the next generation of leaders. It is a unique training in small groups with a focus on peer learning, simulations, professional debates and solving case studies. It gives you the opportunity to further develop your business and leadership skills; to meet and work in teams with talented students from top companies in varied industries; to create professional networks.

Degree courses offered by the Faculty:

Master of Business Administration, MA  
Enterprise Theory and Practice, PhD

## Faculty of Arts

The Faculty of Arts is one of the youngest faculties of the university offering studies in humanities and social sciences. The academic and research portfolio of the faculty relies on three pillars: classical humanities, social sciences and educational science. The Central European Studies Programme provides complex social science knowledge about the history of the peoples in the territory, their political systems, cultures, religions, literatures, interethnic connections, economies, and analyses of historical and current problems. The programme consists of three parts: introduction, professional and differentiated, with both theoretical and practical courses. It is supplemented with optional courses and involves researching and writing a thesis. In each academic year a Central European (Polish, Czech, Slovak, etc.) visiting teacher explains the political culture of that particular country. Students have the possibility of learning Central European languages. Graduates in Central European Studies will be well-informed in complex social studies. The program is particularly recommended to those who deal with any field of social sciences or who want to work in public and/or political institutions, in the media, etc. Full knowledge about Europe is unimaginable without this special region of the continent.

Degree courses offered by the Faculty:

Central European Studies, MA
