

The image shows a vertical sheet of graph paper. It features a grid of small squares. A single vertical line runs down the center of the page, creating a margin on both sides. The grid extends to the edges of the page, forming a large rectangular area for writing or drawing.

This image shows a vertical sheet of graph paper. It consists of a grid of small squares. A single vertical line is drawn down the left side, creating a margin. The grid extends to the right edge of the page. There is no text or data on the grid.

This image shows a full page of graph paper. It features a grid of small squares. A vertical line is drawn down the page, approximately one-tenth of the way from the left edge, creating a narrow margin. The grid extends to the right and bottom edges of the page. The top edge of the grid is slightly irregular, suggesting it might be a scan of a physical sheet of paper.

A large rectangular grid of empty cells, approximately 200 columns wide and 150 rows high. The grid is composed of thin black lines forming a uniform pattern of squares. There is no text or data within the cells.

This image shows a vertical sheet of graph paper. It consists of a grid of 30 columns and 40 rows of small squares. The grid is oriented vertically, with the longer side of the sheet being the height of the grid. The lines are thin and black, creating a uniform pattern of squares across the entire area.

This image shows a full page of graph paper. It features a grid of small squares. A single vertical line is drawn on the left side of the page, approximately one-tenth of the way from the left edge, creating a margin. The rest of the page is filled with the grid pattern.

The image shows a vertical sheet of graph paper. It consists of a grid of small squares. A single vertical line runs down the center of the grid, creating a narrow margin on either side. The grid is composed of 24 columns and 100 rows. The central vertical line is positioned between the 12th and 13th columns from the left edge.
