## PUBLICACIONES Y ARTÍCULOS EN LÍNEA

- **The first geologic map of Sonora:** este artículo se basa en el mapa Geológico que José Guadalupe Aguilera Serrano incluyó en la publicación de 1888 sobre el terremoto del 3 de mayo de 1887 en la parte noreste del estado de Sonora. Dicha carta se toma como la “primer carta geológica de Sonora” y el artículo nombra las formaciones y unidades con las que Aguilera las nombró y describió así también describen las actuales. [ACCESAR AL ARTÍCULO](#)
- **Las gemas de México:** en este artículo se mencionan cinco gemas que son el ópalo, ámbar, fluorapatita, topacio y danburita, de las cuales únicamente el ámbar y el ópalo son explotadas y aprovechadas como gemas, mientras que el topacio lo explotan de manera ocasional y la danburita y fluorapatita son ganga en yacimientos metalíferos y son comercializadas a pequeña escala. [ACCESAR AL ARTÍCULO](#)

- **Landslide inventory map of Guadalupe Range, north of the Mexico Basin:** este artículo de la Sierra de Guadalupe es preocupante ya que aquí identifica 206 sitios de peligro por deslizamiento, pues las condiciones naturales, geológicas, geomorfológicas y climáticas aunadas al factor humano (deforestación, cambios de condiciones originales de las pendientes, tránsito pesado y exploración de minas a cielo abierto) han hecho estos sitios de un alto riesgo. [ACCESAR AL ARTÍCULO](#)
- **El arreglo morfoestructural de la Sierra de las Cruces, México Central:** en este trabajo se propone un modelo morfoestructural a la Sierra de las Cruces, a través de análisis de fotografías aéreas, procesamiento de imágenes de satélite, modelos sombreados, mapas temáticos y trabajo de campo y los resultados indican que dicha sierra se divide en los bloques norte, centro y sur con diferencias de altitud, pendiente, densidad y dirección de morfolineamientos, patrones de drenaje, energía del relieve, profundidad de disección y orientación. [ACCESAR AL ARTÍCULO](#)
- **Mineral Commodity Summaries 2008:** este resumen contiene todos los minerales y una breve reseña de su comportamiento dentro de los Estados Unidos durante los últimos 5 años, (del año 2003 al 2007), así como el total del mineral reciclado, las importaciones, y tendencias del mineral dentro de este país. Como información extra en tablas contiene los dos últimos años de la producción mundial así como las reservas mundiales de todos y cada uno de los minerales. [ACCESAR EJEMPLAR](#)
- **Science News: Discovery of Earth's Inner, Innermost Core Confirmed -ScienceDaily (Mar. 10, 2008)** esta pequeña nota habla del descubrimiento de geólogos de la Universidad de Illinois que muestran su modelo 3D del núcleo de la tierra y el texturizado de cristales de hierro.
