

Frequent Traveler Program for Pets

This is a free program whose purpose is to speed up the attention given to users who usually travel to Mexico with their dogs and cats.

If you travel on a regular basis and you want to travel with your pet, now you can easily do it. Request its admission to the Frequent Traveler Program for Pets. You should only complete the application, attach the pet's good health certificate issued by a private Veterinarian Zootechnician holding a professional license, as well to have the current rabies vaccination and treatment against ectoparasites and endoparasites (less than 6 months).

If your pet is registered in this program, it shall be granted with the Entry Record, an official format issued by the SENASICA, which contains your and your pet's general data, and de-worm and vaccination record. This document also certifies the health condition of your pet every time it gets into the country.

You can use the Entry Record to get into the country for a 6 month-time period, provided that de-worm and rabies vaccination are in force and your pet is healthy.

As a member of the Frequent Traveler Program for Pets, you shall have the following advantages:

You should not submit another Health Certificate during 6 months, since our staff shall perform the relevant physical inspection when you arrive to the country in order to validate health conditions.

You reduce your waiting time.

Data record shall not be necessary, since such data will be registered in our database when you obtain the document. Only the validity of the de-worm and vaccination will be verified.

You shall not wait for a hard copy of the Import Certificate; this will be sent electronically to your e-mail.

The "Entry Record" will be granted nationwide at the Office of Agriculture and Livestock Health Inspection (OISA) and at SENASICA's headquarters.

For more information, call to 59051000 ext. 53611, 54326 and 51020, (0155) 43130154; 43130155 and 43130152
