

## **The 2020 National Standardization Program has been approved**

To fortify the regulatory framework and streamline processes and laws concerning agro-alimentary matters

The National Advisory Board of Agro-Alimentary Standardization (CCNNA) of the Secretariat of Agriculture and Rural Development seeks to reduce the preparation, discussion and issuance times for Mexican Official Standards for agro-alimentary matters.

The CCNNA fortifies the regulatory framework for the sector and provides more assurances in the preparation of standards that regulate the agro-alimentary sector activities for the benefit of Mexican consumers and producers.

The modification and updating of agro-alimentary sector policies enables the country to be productive and competitive in a global context, thanks to the streamlining of processes, laws and official agreements.

To fortify the regulatory framework and streamline official processes, laws and agreements, the Secretariat of Agriculture's CCNNA approved the 2020 National Standardization Program.
