

Authorization of Responsible Veterinarians in TIF establishments.

The Sader, in accordance with the provisions of the Federal Animal Health Law -through Senasica, is responsible for guaranteeing the safety of goods of animal origin processed in TIF establishments.

It is important to define the criteria and procedures to be applied by the DGIAAP to grant authorization to Veterinarians interested in performing as Authorized Responsible Veterinarians (ARVM) in TIF establishments. This will equip Senasica with the necessary technical capacity to comply with the official provisions in the scope of their authorization, ensuring the correct application of inspection and verification processes, as well as the issuance of official documents that prove compliance with applicable provisions in TIF establishments. As mentioned hereinabove, Senasica must ensure that these Veterinarians have the necessary skills and abilities to evaluate and report on the results obtained in the different types of TIF establishments.

The purpose of this procedure manual for Veterinarians interested in obtaining Senasica's authorization in the area is to define the criteria, requirements and procedures that Senasica's public servants will apply to delegate these functions to private individuals.
