Reliable Introducer Program

Applies to stockyards or those persons who present for slaughter batches of cattle made up of different fattening or production units.

The Reliable Introducer is a program that Senasica has designed to prevent the use of Clenbuterol in cattle feed intended for human consumption, so that the introducer can slaughter in Federal Inspection Type (TIF) establishments and municipal slaughterhouses and be recognized as a supplier of healthy, safe, and quality meat for the benefit of the consumer.

Livestock must come from units that have a clenbuterol-free herd certificate, a Reliable Supplier certificate and/or a current Good Animal Husbandry Practices Certificate.

The Reliable Introducer is a program that Senasica has designed to prevent the use of Clenbuterol in cattle feed intended for human consumption, so that the introducer can slaughter in Federal Inspection Type (TIF) establishments and municipal slaughterhouses and be recognized as a supplier of healthy, safe, and quality meat for the benefit of the consumer.

The "Reliable Introducer (Bovine Slaughter) Program" applies to stockyards or those persons who present for slaughter batches of cattle made up of different fattening or production units.

Livestock must come from units that have a clenbuterol-free herd certificate, a Reliable Supplier certificate and/or a current Good Animal Husbandry Practices Certificate.
