

Current status of brucellosis control in Mexico

The State of Baja California Sur is declared free of brucellosis and Sonora is free of brucellosis caused by smooth brucellosis strains. Eradication is in progress in 29.16% of the national territory (the states of Campeche, Colima, Guerrero, Nayarit, Quintana Roo and Yucatán, as well as the A regions of Aguascalientes, Baja California, Chiapas, Guanajuato, Hidalgo, Estado de México, Puebla, Oaxaca and Querétaro are in the eradication phase).
