

# **2020-2024 Senasica's Strategic Planning**

The strategic road map of the Senasica defines their allocation of resources for the 2020-2024 term, to create value in the strategic processes and deliver quality products and services for its users (agriculture and livestock producers, federal and state health and safety public servants, and for reference to national, regional, and international health protection organizations), and thus achieve tangible results in the protection and preservation of agriculture and livestock health, and agro-alimentary safety.
