

Be a Responsible Traveler

Do you want to continue tasting the best Mexican dishes?

Don't risk the pork production, avoid shortages and price increases, it's for everyone's enjoyment!

Join the actions to prevent the entry of African Swine Fever into Mexico:

- DO NOT TRANSPORT pork products from abroad, if you do, DECLARE THEM!
- Even processed and packaged products can harbor the "African swine fever" virus. DON'T TAKE THE RISK!
- Upon arrival, do not bring down food leftovers; deposit them in the special containers.
- Facilitate the inspection of your luggage by the sanitary authorities at the points of entry into the country.
- Step on the sanitary mat.

It DOES NOT AFFECT HUMANS, but we can bring it in processed or raw food from abroad and even through clothing and footwear.
