

Guide to the Electronic Phytosanitary Certificate (ePhyto)

ePhyto is the electronic version of a phytosanitary certificate in XML format.

The IPPC ePhyto solution is a tool that converts information from the paper phytosanitary certificate into a digital phytosanitary certificate or "ePhyto". This electronic exchange between countries makes trade safer, faster, and cheaper.

Consult your ePhyto according to the procedure outlined in [Fact Sheet No. 23](#).
