

30 years of Professionalization on Inspection Service in Mexico

Conferences

On 2021, SENASICA commemorated 30 years of professionalization on Inspection Service, in an event held on July 6 and 7, in which experiences and challenges related to Plant and Animal Health Inspection in various countries were addressed. We share more of the past, and the activities carried out by the Agronomists, Veterinarians and Biologists, who in 1991 integrated the Executive Coordination of Plant and Animal Health Inspection, to protect the agricultural sector from the introduction of pests and diseases to guarantee healthy and safe food in your table.

Invited speakers and representatives from the governments of Chile, USA, Canada, Germany and Australia addressed issues of interest around inspection systems in the import and movement of agricultural goods.

Herein you can consult the presentations and the answers to the queries made by the audience during the presentations.

- **Panel 1: Inspection systems applied to national movement and foreign trade**
- **Panel 2: Health treatments and sampling applied to national movement and foreign trade**
- **Panel 3: Foreign trade to dismantle non-tariff barriers, challenges in the next twenty years**
