

International Year of Plant Health 2020

120 years of Plant Health in Mexico

International Year of Plant Health 2020

In December 2018, the Food and Agriculture Organization of the United Nations (FAO) proclaimed 2020 the International Year of Plant Health (IYPH). This year is a unique and unrepeatable opportunity to raise international awareness of how plant health protection can help eliminate hunger, reduce poverty, protect the environment and stimulate economic development.

"PROTECT PLANTS, PROTECT LIFE".

Objectives

- Raise awareness about the importance of healthy plants to achieve the 2030 Agenda for Sustainable Development.
- Highlight the impact of plant health on food security and ecosystem functions.
- And share best practices on how to keep plants healthy while protecting the environment.

The IYPH will emphasize prevention and protection, and the role each of us can play in ensuring and promoting plant health.

Let's celebrate 120 years of Plant Health in Mexico!

2020, is a year of double importance, since at the same time of the activities of the International Year of Plant Health, in Mexico we are commemorating 120 years of Plant Health in our country, that is why we invite you to learn more about the actions aimed at raising awareness about the importance of plant health protection.
