

TRACEABILITY

an ally in food safety

Breeding

Grazing

Fattening

Slaughter

Processing

Traceability guarantees the food you consume is safe and does not represent a health risk.

These are procedures that record each phase from the breeding of an animal to its subsequent distribution; identifying location, time and area of each stage and any sanitary risk factor or contamination throughout each step.

Thus, in the event of any sanitary emergency, it is possible to determine at what stage of the process did the problem arise, and to withdraw the product from the market in a

Consequently, the new Computerized Traceability System for Agricultural, Aquaculture and Fishing Commodities (SITMA) has been implemented to identify the origin of Mexican products and their entire process as part of a product traceability.

TRACEABILITY OFFERS CERTAINTY IN THE FOOD YOU CONSUME.
