

# Animal Health Indicators

## Results Indicator Matrix

The [Indicator Matrix for Results](#) (MIR) is a working instrument in which performance indicators are established, allowing monitoring and evaluating a project or program, as is the case of the Agro-alimentary Health and Safety Program (PSIA). In this section you can consult the Means of Verification of the performance indicators, with quarterly, half-yearly or annual progress reports, under the responsibility of the General Directorate of Animal Health, which are made up of the sources of information in which the necessary and sufficient data for the indicators are available (at each level of the MIR).

A1.2 Percentage coverage of at-risk sites with animal health epidemiological surveillance actions.

A2.1. Percentage of aquaculture production units with actions for the prevention or control of aquaculture diseases.

A2.4. Percentage of actions implemented for the control and eradication of regulated animal health pests and diseases.

A4.1.2 Percentage of animal health prevention activities implemented

A4.1.3 Percentage of outbreaks of exotic animal pests and diseases treated with anti-epidemic measures.

A4.2.1 Percentage of phytosanitary diagnostics, samples, analyses for animal health diagnostics performed.

A4.2.2 Percentage of processes for the development, standardization or validation of phytosanitary diagnostic methods carried out, and standardized or implemented laboratory techniques carried out in animal health.

A4.3 Percentage of dues paid to international or national organizations for regional, national or international cooperation mechanisms - Programmed progress for the 2nd quarter.

A4.4 Percentage of support provided to plant and animal health advisory councils - No progress reported, support has not yet been provided.

A4.5 Percentage of grants awarded for scientific contribution and merit - Report scheduled for 4th Quarter

C1. Surveillance index for the detection of phytosanitary pests and diseases.

C2. Percentage of phytosanitary and aquaculture work programs implemented in accordance with established strategies.

C.4.1 Index of strategic actions for the prevention and strengthening of sanitation activities

C.4.2 Rate of diagnostic laboratory results reports issued on a timely basis

P1. Index of conservation and improvement of national phytosanitary status.

P3. Index of conservation status free of pests and diseases considered to be of high impact.
