

TIF Origin Movement Notice(AMTIF)

Animal-derived goods originated at a TIF establishment do not entail a zoosanitary risk, and thus it is feasible to exempt them from the Movement Zoosanitary Certificate (CZM, in Spanish) requirement for transit across national territory; only a TIF origin movement notice would be required.

Access the system: [TIF Origin Movement Notice](#)

The TIF system minimizes the risk of meat products from becoming a source of diseases that may spread to humans and other animals, and it reduces impacts to public and animal health, the economy and national supplies.
