Warning	**Adobe acrobat cybersecurity bulletin.**
TLP	AMBER+STRICT
Description.	A. The U.S. Cybersecurity and Infrastructure Security Agency (CISA) issued a security alert related to a critical vulnerability in Adobe Acrobat Reader, identified as CVE-2023-21608.
	B. This is a use-after-free bug, which occurs when an application component attempts to access data at a memory address it has already freed.
	C. It is the second vulnerability in Adobe Acrobat and Reader that has been exploited on a large scale in 2023.
	D. Affected versions
	a. Acrobat DC - 22.003.20282 (Windows), 22.003.20281 (Mac) and earlier versions (fixed in 22.003.20310).
	b. Acrobat Reader DC - 22.003.20282 (Windows), 22.003.20281 (Mac) and earlier (fixed in 22.003.20310).
	c. Acrobat 2020 - 20.005.30418 and earlier (fixed in 20.005.30436).
	d. Acrobat Reader 2020 - 20.005.30418 and earlier (fixed in 20.005.30436).
Recommendations	▪ Keep your device's operating system up to date.
	▪ Have an antivirus tool.
	▪ Limit user privileges.
	▪ Make security backups.
