

Consultation module for the control and monitoring of toxic residues and contaminants

Senasica works to preserve animal health and maintain a competitive level of marketed products.

To fulfill this purpose, Senasica annually establishes the [National Program for the Control and Monitoring of Toxic Residues in goods of animal origin, aquaculture and fishery residues](#) and the [National Program for the Monitoring of Pesticide Residues in Vegetables](#)

- [Criteria for the operation, application and interpretation of analytical methods.](#)
- [Table of maximum limits for toxic residues and contaminants.](#)
- [Sampling of Toxic Residues in TIF Slaughter and Shell Egg Processing Establishments.](#)
- [Consultation of the Agreement establishing the criteria](#)
